UNITED STATES DEPARTMENT OF AGRICULTURE
WEATHER BUREAU
WASHINGTON

Office of the Chief

July 23, 1934

Supplement to Circular "Instructions for Trans-
mitting Airplane Weather Observations Via Tele-
type and Radio" dated June 15, 1934.

Paste the following on page 3:

At stations on teletype circuits, when no observation has been made up to 8:12 a. m., E. S.T., a report will be filed giving the reason. For example, "OH 8/no apob dense fog."

At stations not on teletype circuits and where these reports are first telegraphed to a point on the teletype circuit, the latter point will file a message as indicated above, omitting the reason for no observation. The call letters in such cases will be those of the airplane weather observation station.

If an observation is made later, the report will be filed in the usual manner.

W. R. Gregg,
Chief of Bureau.
